

Career Advising Policy

This policy has been developed as prescribed in R.C. 3313.6020 and the State Board of Education's Model Policy. This policy shall be updated at least once every two (2) years. The policy shall be made available to students, parents/guardians/custodians, and local postsecondary institutions, residents of the District, and shall be posted on the District website.

Career advising is an integrated process that helps students understand how their personal interests, strengths and values might predict satisfaction and success in school and related career fields, as well as how to tie these interests and strengths to their academic and career goals. Students need to have access to comprehensive resources and support to prepare for their future success. Through relevant classroom instruction, career-related learning experiences, and a program of counseling and advising, students can discover their interests and explore academic and career pathway options.

Patriot's plan for career advising includes, providing:

1. Grade-level examples that link students' schoolwork to one or more career fields by implementing the Career Connections Learning Strategies offered by the Ohio Department of Education.
2. Career advising to students in grades 6-12, which includes meeting with each student at least once annually to discuss academic and career pathway opportunities.
3. Training for employees on how to advise students on career pathways, including use of the tools available in [OhioMeansJobs K-12](#) and other online sources provided by the district.
4. Multiple academic and career pathways through high school that students may choose to earn a high school diploma, including opportunities to earn industry-recognized credentials and postsecondary course credit.
5. Information on courses that can award students both traditional academic and career-technical-credit.
6. Documentation on career advising for each student and student's parent, guardian or custodian to review, as well as schools that the student may attend in the future. These include activities that support the student's academic, career and social/emotional development.
7. The supports necessary for students to transition successfully from high school to their post-secondary destinations, including interventions and services necessary for students who need remediation in mathematics and English language arts.

8. Additional interventions and career advising for students who are identified as at risk of dropping out of school. These include:
 - a. Identifying students who are at risk of dropping out of school using a local, research-based method with input from teachers, school counselors and other appropriate school staff.
 - b. Developing a Student Success Plan for each at-risk student that addresses both the student's academic and career pathway to successful graduation and the role of career-technical education, competency-based education and experiential learning, when appropriate.
 - i. Before a district develops a pupil's Student Success Plan, district staff will invite the student's parent, guardian or custodian to assist. If that adult does not participate in the plan development, the district will provide the adult a copy of the plan, a statement of the importance of a high school diploma and a listing of the pathways to graduation available to the student.
